ART TECHNOLOGY

Spellbinding Luminokinetic Creations by Bardula

Published Mar 24, 2023

Bardula is the artistic name of a Paris-based creative couple that are known for combining light, reflection, and new technologies to create fascinating kaleidoscopic works of art.

Since their first collaboration on some pieces for the Baccarat Hotel (New York) back in 2014, their one-of-a-kind luminokinetic artworks have gained significant attention from art enthusiasts all over the world.

"Drawing on light, transparency, reflection, and virtual volume, Bardula investigates optical effects on a geometrical basis, and explores mathematical figures, extracted from 3D digital models, and movements inspired by vortex phenomena."

Their works explore the intersection of art, science, and technology using geometrical patterns to create an infinite array of shapes and colors. These optical illusions play with light in such a way that it creates an immersive experience for anyone viewing them. Each piece evokes a sense of wonder as it engages the viewer's perception of space, time, and movement.
