

Bardula has her solo exhibition

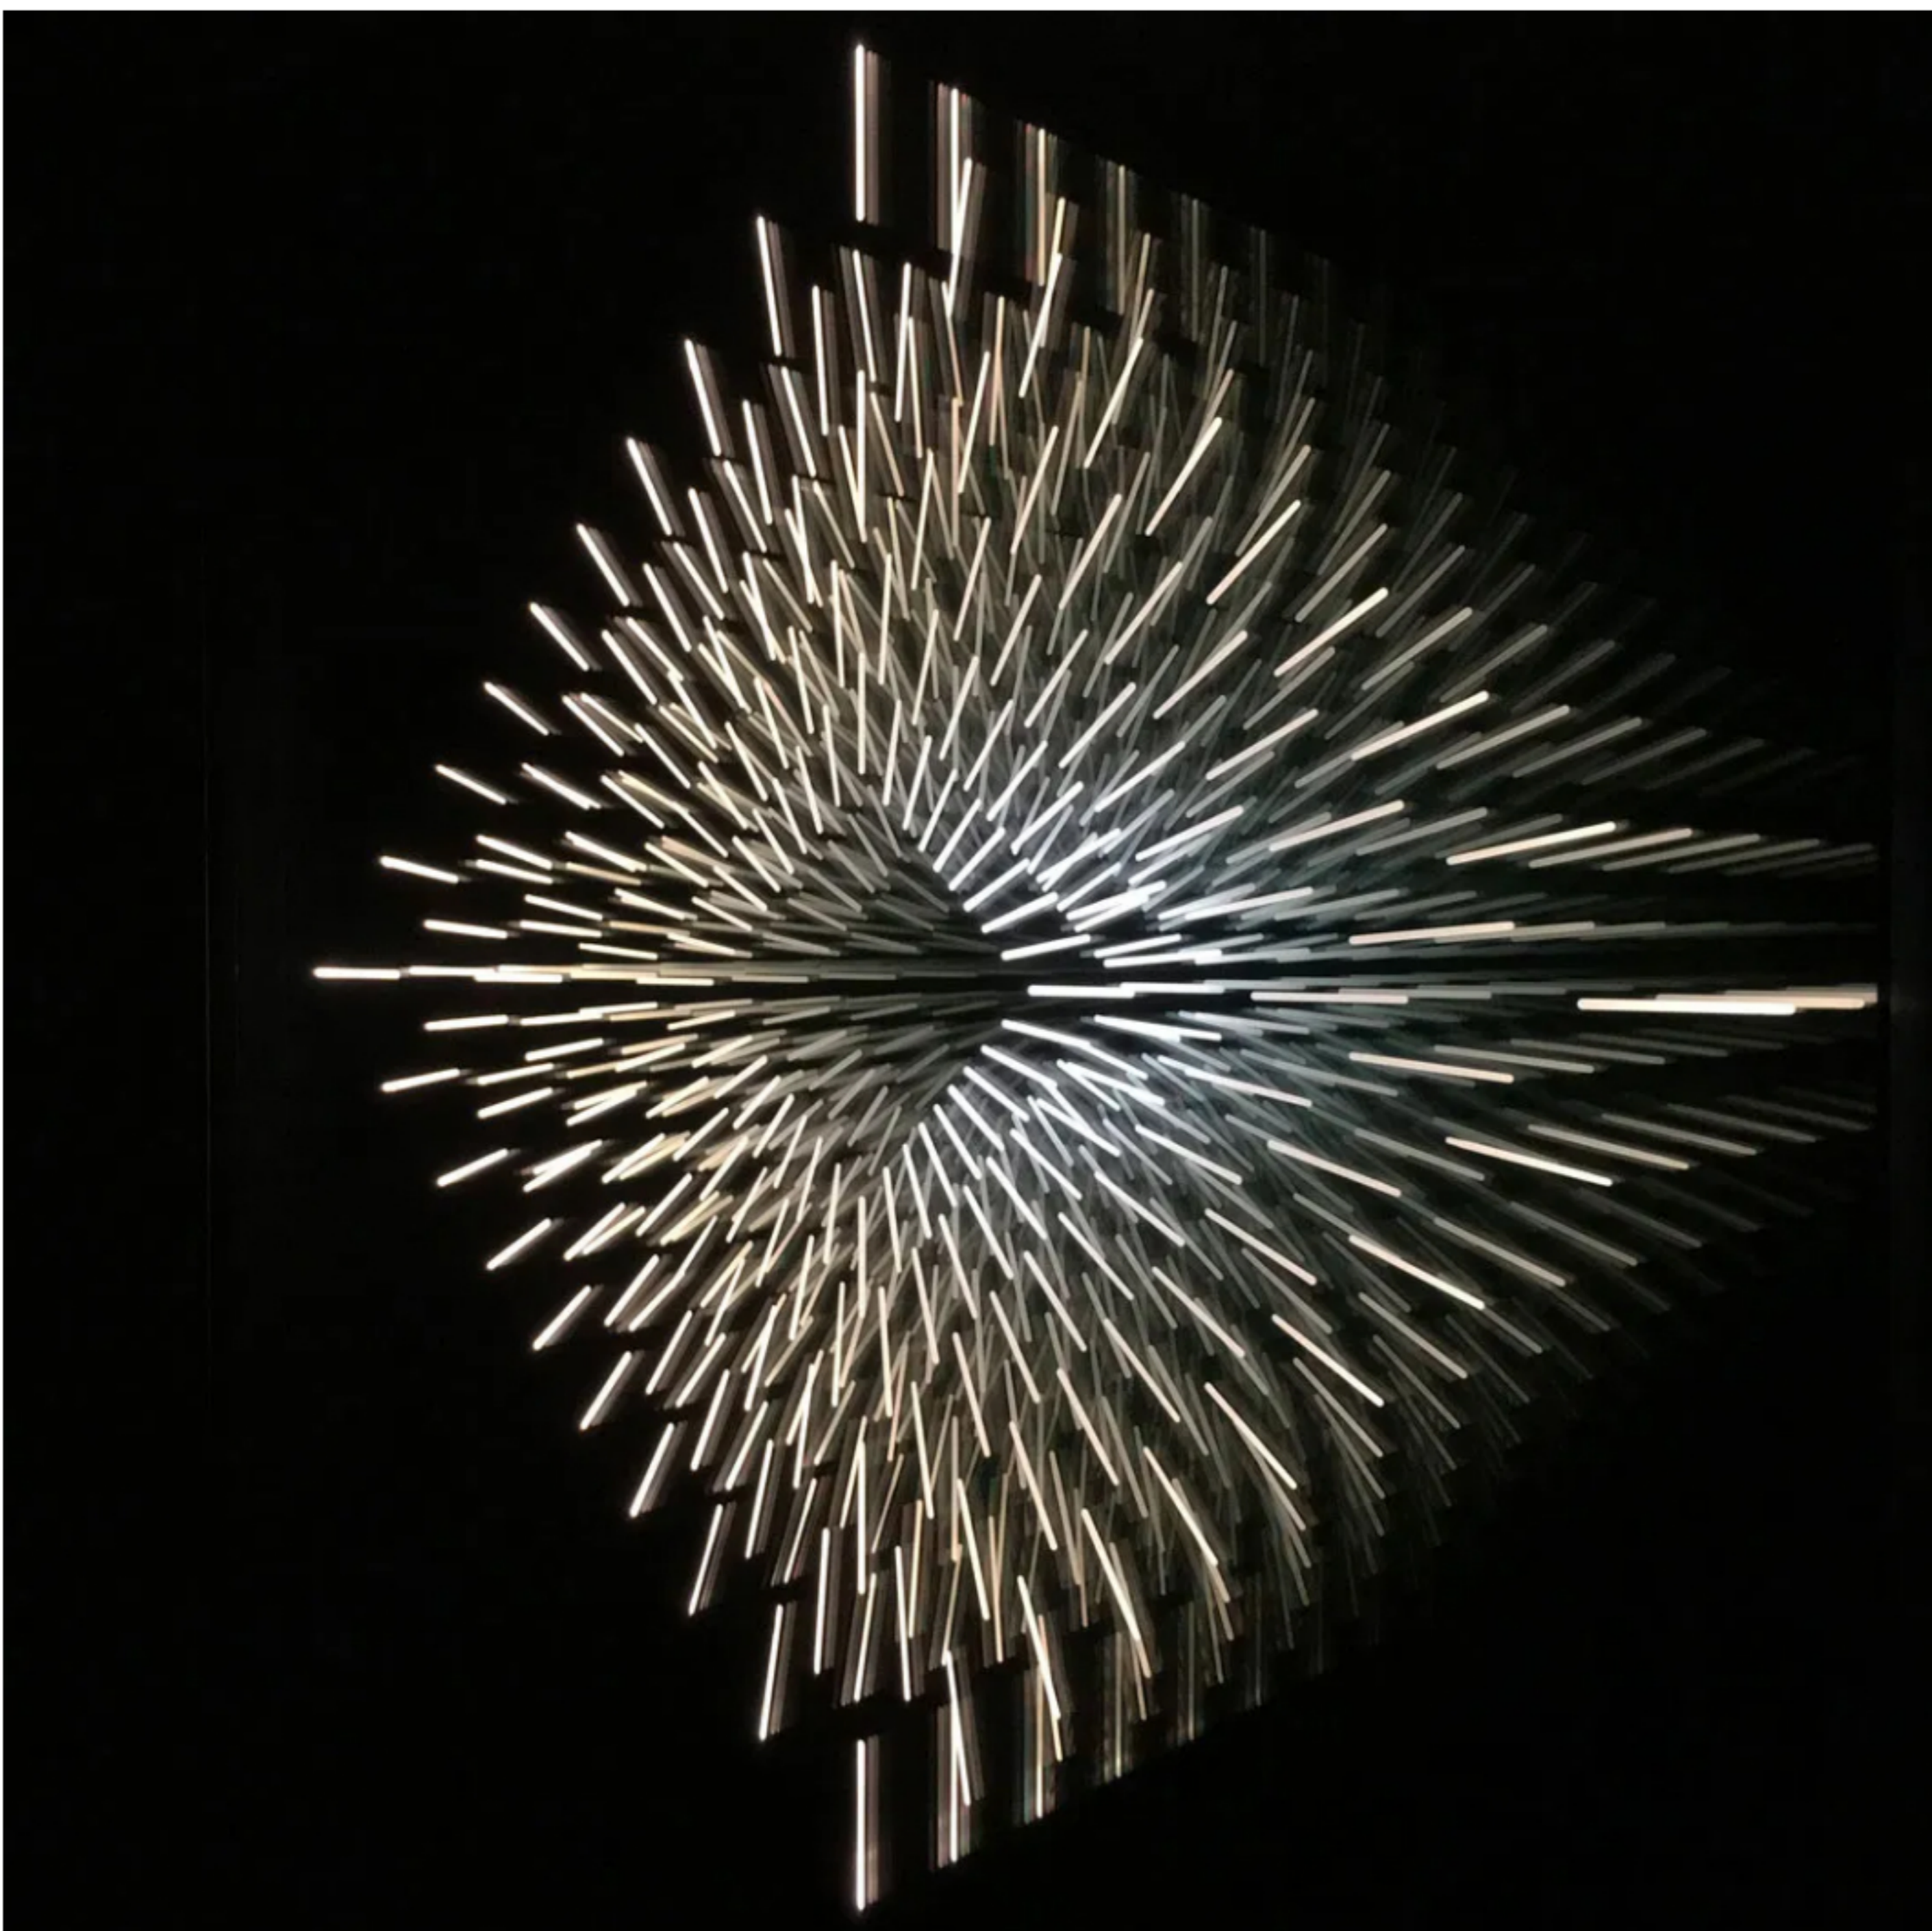

French artist

Galerie La Ligne that represents **Bardula** since 2015 will show the Parisian artist's work once more on the occasion of her personal exhibition from September 2nd to October 21st 2017.

Bardula (**of whom we already told you about**) will exhibit a kinetic and luminous optical collection that revisits geometric shapes -squares, circles and spheres- or complexes as the mathematical Torus.

These shapes, animated by subtle deformations which create a volume illusion but also expansion and whirl movements, are glorified by the light with the use of LED.
