Solo exhibition of Bardula

Galerie la Ligne will be featuring Bardula's artistic output for the fourth time, including recent shows within the international contemporary art fair Art Paris where the artist's work was exhibited in both its 2017 and 2016 editions . Bardula has been represented by the gallery since 2015.

Bardula will present a selection of her latest works which uses LED's technology. The artist's new kinetic and optical series focuses on revisiting simple geometrical shapes such as spheres, circles and squares, or complex ones such as the torus. These shapes, animated by subtle modifications and magnified by LED light, generate the illusion of volume and movement, swirling and expanding before the viewer's eyes.
